

THE HEARING VOICES APPROACH

2 Day introductory course

'Hearing Voices' is a term used to represent the experience of what is also called 'auditory hallucinations', or hearing things that other people cannot. 'Hearing Voices' can also be related to the experiences of seeing visions, sensing things and beliefs that others may find unusual.

Many people hear voices and find them helpful, sacred or just a normal part of life. Some people find voices confusing or frightening and seek help to cope. These people are commonly diagnosed with schizophrenia or another mental illness.

Dates	1st & 8th September 2017
